WORKING PAPERS AND RESEARCH IN PROGRESS

"What are the Labor Market Effects of U.S. State-Level R&D Tax Credits?" Working paper.

Studies whether state-level R&D tax credits affect the R&D labor market using staggered adoption across U.S. states and event-study differences-in-differences designs.

"The Geography of Entrepreneurship: Evaluating the Role of Learning and Sorting across Locations." Research in progress, with Elio Nimier-David.

Uses French administrative panel data linking salaried and self-employed workers to study how location and career histories shape entrepreneurial entry and outcomes.

"Unpacking Agglomeration: Industrial Diversity and Knowledge Spillovers." Research in progress, with Eleonora Patacchini and Davide M. Coluccia.

Studies knowledge spillovers arising from agglomeration in the U.S. between 1850 and 1910. Builds machine learning and text-analysis tools to use historical patent texts in order to measure technological relationships between innovation in U.S. industries during this period.
